Notice for TC 295's 3rd ad-hoc meeting on data modeling

Dear members,

Firstly hope you everything goes well!

The ad-hoc meeting on data modeling is scheduled on **April 19, 2021 at 19:00-21:00 Beijing time (GMT+8)**. Please see the Annex A for meeting agenda and Annex B for Zoom access details.

Recently the expert Mr. Nobuyuki Sambuichi from Japan submitted a proposal to specify the semantic data modeling and syntax binding for XBRL. Concerning the fundamental role that semantic data modeling plays to keep the consistency of all data elements standardized in TC 295, as well as too many technical alternatives related to this subject, it would be better to hold more discussions and then decide the best option for TC 295. Additionally, data modeling is the subject that many experts have been focusing on for a long time. I sincerely look forward to knowing your profound insights at the upcoming meeting.

Your participation and contribution are vital to the success of TC 295. On behalf of the secretariat of TC 295, I would like to express my sincere gratitude to all members. Should you have any questions or doubts, please don't hesitate to contact me by email or by phone:
