Notice for TC 295's 5th ad-hoc meeting on data modeling

Dear members,

Firstly hope you everything goes well!

The ad-hoc meeting on data modeling is scheduled on **May 31, 2021 at 11:00-13:00 (GMT+0)**. Please see the Annex A for meeting agenda and Annex B for Zoom access details.

This meeting is still going to discuss the data modeling approaches for TC 295, which will include two parts.

The first part is about the UN/CEFACT Core Component Library (CCL). At the meeting, the secretariat will collect all questions about CCL issue, for example, what specific problem you would like to discuss with UN/CEFACT experts, what concerns you have if to combine the CCL with TC 295, etc. It's noted that the meeting only focuses on collecting questions other than making a conclusion. Then, these collected questions will be sent to TC 154 or UN/CEFACT for reference. I believe it will be a good way to facilitate the communication with UN/CEFACT.

The second part will depend on the participation of all TC 295 members and experts. Besides Mr. Nobu's data modeling proposal, if you have different ideas on the queries like what are the requirements to create TC 295 data modeling? which way may be appropriate? how to achieve the goal, etc. Please feel free to share at the meeting. I sincerely hope you and your national interested parties could join this brainstorming.

Your participation and contribution are vital to the success of TC 295. On behalf of the secretariat of TC 295, I would like to express my sincere gratitude to all members. Should you have any questions or doubts, please don't hesitate to contact me by email or by phone:
